THE MINISTER OF STATE IN THE MINISTRY OF RAILWAYS (SHRI BANDARU DATTATRAYA): (a) Yes Sir.

(b) Not to the knowledge of this Ministry.

(c) and (d) Rails, under traffic, some times get over-stressed and result into fracture. There are various reasons for over-stressing of rails. Excessive hydrogen content in rail steel is also one of the causes leading to rail fractures.

The permissible hydrogen content in rail has been reduced to 2ppm and is well comparable with world standards. The rails in Bhilai Steel Plant are being manufactured to this specification.
